

ATTENTION: ALL SHOOTERS

The Trustees of the Barre Fish and Game Club are trying to make our shooting spaces more safe and easier to maintain. But we need your help! The new berm structure (& more to follow?) will help contain any ricochets should they happen, but we also need you to follow these most important rules !!!

*Only benches #1 and #2 **WILL** be used for the 25 yard berm...you can shoot the other ranges from there, but no other benches can shoot to the 25 yard berm.

* Use only the target backing as provided...do **NOT** attach **ANY targets to the wooden structure.**

* Do **NOT** use any clay bird or pieces of clay bird...nor any other item on the dirt berm itself .

* Do **NOT** use targets which project above the target backing itself, as we are trying to get projectiles to hit the berm as low as possible! This also goes for all berms at present.

* Absolutely **NO** targets on the ground in front of the target backing !

Failure to adhere to these rules and others as provided on the range permit WILL result in immediate dismissal from the range....and may result in permanent loss of range privileges !

The Club reserves privilege to change any rule at any time !

Regards, Barre Fish and Game Club Trustees
